Plant Pathology is published for the British Society for Plant Pathology which is solely responsible for editorial policy. It has been developed from the journal with this title previously published by Her Majesty's Stationery Office for the Ministry of Agriculture, Fisheries and Food for England and Wales and maintains the sequence of those volumes.

Plant Pathology publishes research papers and critical reviews on all aspects of plant pathology. Short reports of new or unusual records are also published. Letters to the editors are welcome when these comment on matters relevant to plant pathology.

While the Senior Editor takes all possible care to ensure that information contained in the journal is accurate, neither he nor the British Society for Plant Pathology can be held responsible for any loss or damage resulting from reliance upon material published in *Plant Pathology*.

Subscription information

Plant Pathology is published bimonthly (one volume per annum) and the subscription prices for 1992 are £155.00 (UK), £166.00 (Overseas except North America), $280.00 (US and Canada), in all cases post free. Orders for current subscriptions and back issues should be sent to Journal Subscriptions Dept., Marston Book Services, PO Box 87, Oxford, UK (telephone no. 0865 791197, telex 837515 Mardis G, fax 0865 721205); all other business correspondence, including orders for offprints and advertising space, should be addressed to Blackwell Scientific Publications Ltd, Osney Mead, Oxford OX2 0EL (telephone no. 0865 240201, telex 83355 Medbok G, fax 0865 721205).

Despatch

The journal is despatched within Europe by surface mail, to other continents by various forms of air-speeded delivery: to the USA* by air freight for forwarding by second-class post, to India by air freight for guaranteed local delivery, and to all other countries by Accelerated Surface Post.
*Second class postage paid at Rahway, NJ. Post Master, send address changes to *Plant Pathology*, c/o Mercury Airfreight International Inc., 2323 Randolph Avenue, Avenel, NJ 07001, USA.

This journal is covered by *Current Contents, SCA* and *Science Citation Index*.

This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works or for resale. Special requests should be addressed to the Senior Editor. 0032-0862/92 $06.00.

This journal is printed on acid-free paper.

Notes for contributors

General

Plant Pathology publishes research papers and critical reviews on all aspects of plant pathology. Short reports of new or unusual records are also published. Letters to the editors are welcome when these comment on matters relevant to plant pathology. Reports of screening for pesticidal activity or cultivar resistance are not normally published. All material submitted for publication is reviewed by the editors who act on advice from referees. The editors will particularly welcome papers that apply the scientific method, describing not only the collection and interpretation of information but also the critical testing of hypotheses. Only papers written in English are accepted. They must not have been accepted for publication elsewhere. Papers become the copyright of the journal. No charge is made for publication (except for colour plates) but authors will be required to pay for excessive alterations to agreed scripts at the proof stage. Fifty offprints of each paper are provided free, and additional copies may be ordered when proofs are returned.

Preparation of manuscripts

Text. The text should be typed on one side only of A4 paper (297 × 210 mm), double-spaced, with wide margins and the sheets numbered consecutively.

Title. This should be informative but concise. It should be followed by the name and address of each author. A short title (for page headlines) of less than 65 characters, including spaces, should be typed at the top of the title page.

Summary. This should indicate concisely (normally in less than 200 words) the scope and main conclusions of the paper.

References. In the text, references should be cited by author and date. Ampersand (&) should be used between names of joint authors and *et al.* for references with more than two authors even when they first appear, e.g. (Jones *et al.*, 1970). References should be listed at the end in full and set out as follows:

Jones C.S. (1980) A forecasting system for leaf blight of tomato. *Phytopathologische Zeitschrift* **49**, 460–469.

Jones C.S., Smith N. & Brown R.S. (1979) Biology of diseases caused by *Botrytis* spp. In: *Diseases of Vegetables* (Ed. by N. Smith & R. S. Brown), pp. 40–49. Blackwell Scientific Publications, Oxford.

Slater M.B. (1977) Diseases of horticultural crops in Europe. *Proceedings of the 1977 British Crop Protection Conference — Pests and Diseases*, pp. 135–140.

Units and quantities. SI units are preferred. Others should be related to SI units at first mention. Numbers preceding units should be written as numerals; those preceding other items up to nine should be spelt out; e.g. 8 cm, 2 days, nine fields, 10 leaves. Units should preferably be explicit, e.g. 1 g/l rather than 0·1% w/v.

Tables. Each table should be self-explanatory and typed on a separate sheet with an appropriate caption.

Figures. These should be numbered in a separate series from the tables. Figure legends should be self-explanatory and grouped together on a separate sheet.

Photographs should be unmounted and have good contrast. Magnification should be shown by a scale or bar. Three prints of each photograph are required of the desired final size. Two prints only should be labelled or the labelling indicated on an overlay. The figure number and the author's name should be pencilled lightly on the reverse of all prints with the top edge identified. Where several photographs are to be mounted together on the printed page, a sketch of the layout should be provided.

Other figures should be supplied as drawings in black indelible ink, about twice the required size for publication, on smooth white paper or Bristol board, tracing paper or graph paper lined in pale blue or light grey. The original drawing should not be labelled (nor the axes of graphs numbered), but should be accompanied by three labelled copies.

Normally, no original submitted should be larger than A4 (297 × 210 mm).

Submission of manuscripts

Three copies are required. Manuscripts for consideration and related correspondence should be addressed, in the first instance, to the Senior Editor: Dr M. J. Jeger, Natural Resources Institute, Central Avenue, Chatham Maritime, Chatham, Kent ME4 4TB, UK.

Contents

NUMBER 1 FEBRUARY

Letter to the editor

1 *R. Johnson and D. R. Knott.* Specificity in gene-for-gene interactions between plants and pathogens

5 *D. A. C. Pink, D. Kostova and D. G. A. Walkey.* Differentiation of pathotypes of lettuce mosaic virus

13 *H. D. Brix and V. Zinkernagel.* Effects of cultivation, conditioning and isolate on sclerotium germination in *Sclerotium cepivorum*

20 *Anastasia P. Kyriakou.* Incidence in Cyprus of citrus exocortis viroid and its mechanical transmission

25 *N. I. Nashaat and K. Moore.* Resistance responses of albino leaves of *Triticum timopheevii* mutants inoculated with *Erysiphe graminis* f.sp. *tritici*

29 *P. L. Guy.* Incidence of *Acremonium lolii* and lack of correlation with barley yellow dwarf viruses in Tasmanian perennial ryegrass pastures

35 *A. J. L. Phillips.* A comparison of dust and acetone infusion applications of tolclofos-methyl to bean seeds for the control of *Rhizoctonia solani*

41 *Y. Elad, H. Yunis and T. Katan.* Multiple fungicide resistance to benzimidazoles, dicarboximides and diethofencarb in field isolates of *Botrytis cinerea* in Israel

47 *Y. Elad.* Reduced sensitivity of *Botrytis cinerea* to two sterol biosynthesis-inhibiting fungicides: fenetrazole and fenethanil

55 *L. Buchwaldt and H. Green.* Phytotoxicity of destruxin B and its possible role in the pathogenesis of *Alternaria brassicae*

64 *K. J. Barr and M. J. C. Asher.* The host range of *Polymyxa betae* in Britain

69 *H. Iwai, Y. Horikawa, G. Figueiredo and C. Hiruki.* A recessive resistance gene of alfalfa to alfalfa mosaic virus and impact of high ambient temperature on virus resistance

New or unusual records

76 *J. Cotten, D. J. Hooper, M. F. Foley and Mary Hancock.* Stem and bulb nematode, *Ditylenchus dipsaci*, associated with a dry rot of potato tubers

79 *A. Bertaccini and M. G. Bellardi.* A rhabdovirus inducing vein yellowing in croton

83 *A. Beckett, L. Houston and L. C. Frost.* New host records for *Puccinia allii* Rud.

86 *B. D. L. Fitt, F. Bauers, S. Burhenne and V. H. Paul.* Occurrence of *Verticillium dahliae* on linseed (*Linum usitatissimum*) in the UK and Germany

91 *M. H. Pei and J. N. Gibbs.* Axenic culture of *Peridermium pini* from single aeciospores

95 *G. Hall, S. Dobson and C. Nicholls.* First record of *Phytophthora inflata* in the United Kingdom

98 Book reviews

NUMBER 2 APRIL

103 *E. A. Momol and H. C. Kistler.* Mitochondrial plasmids do not determine host range in crucifer-infecting strains of *Fusarium oxysporum*

113 *M. Qhobela and L. E. Claflin.* Eastern and southern African strains of *Xanthomonas campestris* pv. *vasculorum* are distinguishable by restriction fragment length polymorphism of DNA and polyacrylamide gel electrophoresis of membrane proteins

122 *A. Mansour and A. Al-Musa.* Tomato yellow leaf curl virus: host range and virus–vector relationships

126 *J. K. M. Brown, A. C. Jessop, S. Thomas and H. N. Rezanoor.* Genetic control of the response of *Erysiphe graminis* f.sp. *hordei* to ethirimol and triadimenol

136 *S. J. Roberts.* Effect of soil moisture on the transmission of pea bacterial blight (*Pseudomonas syringae* pv. *pisi*) from seed to seedling

141 *L. W. O'Garro and J. M. Clarkson.* Variation for pathogenicity on tomato among parasexual recombinants of *Verticillium dahliae*

148 *S. J. Blunt, M. J. C. Asher and C. A. Gilligan.* The effect of sowing date on infection of sugar beet by *Polymyxa betae*

154 *C. E. Sansford and J. R. Coley-Smith.* Production and germination of sclerotia of *Sclerotinia sclerotiorum*

157 *L. J. Ramos, K. R. Narayanan and R. T. McMillan Jr.* Association of stomatal frequency and morphology in *Lycopersicon* species with resistance to *Xanthomonas campestris* pv. *vesicatoria*

165 *J. J. Burdon and A. M. Jarosz.* Temporal variation in the racial structure of flax rust (*Melampsora lini*) populations growing on natural stands of wild flax (*Linum marginale*): local versus metapopulation dynamics

180 *M. I. Arabi, G. Barrault, A. Sarrafi and L. Albertini.* Variation in the resistance of barley cultivars and in the pathogenicity of *Drechslera teres* f.sp. *maculata* and *D. teres* f.sp. *teres* isolates from France

187 *M. Nasir, H.-H. Hoppe and F. Ebrahim-Nesbat.* The development of different pathotype groups of *Mycosphaerella pinodes* in susceptible and partially resistant pea leaves

195 *D. L. Davies, C. M. Guise, M. F. Clark and A. N. Adams.* Parry's disease of pears is similar to pear decline and is associated with mycoplasma-like organisms transmitted by *Cacopsylla pyricola*

204 *R. B. Maude, R. L. K. Drew, D. Gray, G. M. Petch, W. Bujalski and A. W. Nienow.* Strategies for control of seed-borne *Alternaria dauci* (leaf blight) of carrots in priming and process engineering systems

215 *E. P. Dashwood, R. A. Fox and D. A. Perry.* Effect of inoculum source on root and tuber infection by potato blemish disease fungi

New or unusual records

224 *G. Hall, R. T. A. Cook and N. J. Bradshaw.* First record of *Peronospora sparsa* on *Prunus laurocerasus*

228 *J. Le Guern, Y. Tirilly, D. Le Picard and D. Le Ster.* Bacterial rot of witloof chicory roots caused by *Erwinia chrysanthemi*

232 *D. C. Sandys-Winsch and T. M. Jeves.* The distribution of *Calyptella* root rot in commercial glasshouse tomato crops in England

236 Book reviews

NUMBER 3 JUNE

239 **British Society for Plant Pathology Presidential Address 1991**

255 *J. K. Abood, D. M. Lösel and P. G. Ayres.* Changes in abundance and infectivity of powdery mildew conidia from cucumber plants treated systemically with lithium chloride

262 *U. P. Singh and G. D. Mishra.* Effect of powdery mildew (*Erysiphe pisi*) on nodulation and nitrogenase activity in pea (*Pisum sativum*)

265 *S. Savary and G. van Santen.* Effect of crop age on primary gradients of late leaf spot (*Cercosporidium personatum*) on groundnut

274 *A. Varma, M. Krishnareddy and V. G. Malathi.* Influence of the amount of blackgram mottle virus in different tissues on transmission through the seeds of *Vigna mungo*

282 *W. S. Wahyuni, R. G. Dietzgen, K. Hanada and R. I. B. Francki.* Serological and biological variation between and within subgroup I and II strains of cucumber mosaic virus

298 *P. Ricci, F. Trentin, P. Bonnet, P. Venard, F. Mouton-Perronnet and M. Bruneteau.* Differential production of parasiticein, an elicitor of necrosis and resistance in tobacco, by isolates of *Phytophthora parasitica*

308 *H. D. Brix and V. Zinkernagel.* Screening for resistance of *Allium* species to *Sclerotium cepivorum* with special reference to non-stimulatory resistance

317 *L. J. Spielman, B. J. McMaster and W. E. Fry.* Relationships among measurements of fitness and disease severity in *Phytophthora infestans*

325 *M. M. Roca De Doyle, L. J. C. Autrey and P. Jones.* Purification, characterization and serological properties of two virus isolates associated with the maize stripe disease in Mauritius

335 *E. Levy, F. J. Gough, K. D. Berlin, P. W. Guiana and J. T. Smith.* Inhibition of *Septoria tritici* and other phytopathogenic fungi and bacteria by *Pseudomonas fluorescens* and its antibiotics

342 *S. Manulis.* Evaluation of a DNA probe for the detection of *Erwinia herbicola* strains pathogenic on *Gypsophila paniculata*

348 *B. L. Nolt, B. Pineda L. and A. C. Velasco.* Surveys of cassava plantations in Colombia for virus and virus-like diseases

355 *Tet-Fatt Chia, Yang-Sun Chan and Nam-Hai Chua.* Detection and localization of viruses in orchids by tissue-print hybridization

362 *S. A. Clulow, B. G. Lewis and P. Matthews.* Expression of resistance to *Mycosphaerella pinodes* in *Pisum sativum*

New or unusual records

370 *M. J. Pascual Villalobos and G. J. Jellis.* Occurrence of *Melampsora euphorbiae* on *Euphorbia lagascae* in south-east Spain

372 *D. J. Vakalounakis and A. Papadakis.* Occurrence of a new powdery mildew of greenhouse tomato in Greece, caused by *Erysiphe* sp.

374 Book reviews

NUMBER 4 AUGUST

Letter to the editor

379 *J. B. Rose.* A possible cause of strawberry June Yellows — a degenerative, non-infectious condition

Review

384 *J. G. Harrison.* Effects of the aerial environment on late blight of potato foliage — a review

417 *Y. Elad.* The use of antioxidants (free radical scavengers) to control grey mould (*Botrytis cinerea*) and white mould (*Sclerotinia sclerotiorum*) in various crops

427 *L. V. Madden, L. L. Wilson, X. Yang and M. A. Ellis.* Splash dispersal of *Colletotrichum acutatum* and *Phytophthora cactorum* by short-duration simulated rains

437 *M. Mazarei, M. Reza Hajimorad and A. Kerr.* Specificity of polyclonal antibodies to different antigenic preparations of *Pseudomonas syringae* pv. *pisi* strain UQM551 and *Pseudomonas syringae* pv. *syringae* strain L

444 *D. R. Walters and D. C. Murray.* Induction of systemic resistance to rust in *Vicia faba* by phosphate and EDTA: effects of calcium

449 *Z. B. Nan, P. G. Long, R. A. Skipp and D. H. Hopcroft.* Microscopy of invasion of red clover roots by *Trichocladium basicola*, and effects of benomyl and prochloraz

462 *D. G. A. Walkey, N. F. Lyons and J. D. Taylor.* An evaluation of a virobacterial agglutination test for the detection of plant viruses

472 *R. Bossi and F. M. Dewey.* Development of a monoclonal antibody-based immunodetection assay for *Botrytis cinerea*

483 *C. M. Henry, G. J. Bell and S. A. Hill.* The effect of methyl bromide fumigation on rhizomania inoculum in the field

490 *U. Merz.* Observations on swimming pattern and morphology of secondary zoospores of *Spongospora subterranea*

495 *C. Grondeau, M. Saunier, F. Poutier and R. Samson.* Evaluation of physiological and serological profiles of *Pseudomonas syringae* pv. *pisi* for pea blight identification

New or unusual records

506 *R. T. A. Cook and R. T. V. Fox. Erysiphe pisi* var. *pisi* on faba beans and other legumes in Britain

513 *R. A. C. Morris, J. R. Coley-Smith and J. M. Whipps.* Isolation of mycoparasite *Verticillium biguttatum* from sclerotia of *Rhizoctonia solani* in the United Kingdom

517 Book reviews

NUMBER 5 OCTOBER

Letter to the editor

523 *R. A. McIntosh.* Close genetic linkage of genes conferring adult-plant resistance to leaf rust and stripe rust in wheat

Review

528 *S. Dinant and H. Lot.* Lettuce mosaic virus

543 *H. Ishii, M. van Raak, I. Inoue and A. Tomikawa.* Limitations in the exploitation of *N*-phenylcarbamates and *N*-phenylformamidoximes to control benziamidazole-resistant *Venturia nashicola* on Japanese pear

554 *M. O'Dell, R. B. Flavell and T. W. Hollins.* The classification of isolates of *Gaeumannomyces graminis* from wheat, rye and oats using restriction fragment length polymorphisms in families of repeated DNA sequences

563 *A. Graniti, L. Sparapano and A. Evidente.* Cyclopaldic acid, a major phytotoxic metabolite of *Seiridium cupressi*, the pathogen of a canker disease of cypress

569 *T. P. Wallace and K. M. El-Zik.* Reaction of three cotton (*Gossypium hirsutum*) cultivars to single and mixed isolates of *Xanthomonas campestris* pv. *malvacearum*

573 *N. J. Hayden and R. B. Maude.* The role of seed-borne *Aspergillus niger* in transmission of black mould of onion

582 *E. O'Sullivan and J. A. Kavanagh* Characteristics and pathogenicity of *Pythium* spp. associated with damping-off of sugar beet in Ireland

591 *R. A. Priestley, F. M. Dewey, P. Nicholson and H. N. Rezanoor.* Comparison of isoenzyme and DNA markers for differentiating W-, R- and C-pathotypes of *Pseudocercosporella herpotrichoides*

600 *T. Hsiang and G. A. Chastagner.* Production and viability of sclerotia from fungicide-resistant and fungicide-sensitive isolates of *Botrytis cinerea*, *B. elliptica* and *B. tulipae*

606 *S. F. Carnegie and A. M. Cameron.* Resistance to thiabendazole in isolates of *Polyscytalum pustulans* (skin spot) and *Fusarium solani* var. *coeruleum* (dry rot) in Scotland

611 *D. Rubiales and R. E. Niks.* Histological responses in *Hordeum chilense* to brown and yellow rust fungi

618 *M. S. Pinner, P. G. Markham, E. P. Rybicki and R. S. Greber.* Serological relationships of geminivirus isolates from Gramineae in Australia

626 *R. P. Thakur, K. G. Shetty and S. B. King.* Selection for host-specific virulence in asexual populations of *Sclerospora graminicola*

633 *V. K. Baranwal and H. N. Verma.* Localized resistance against virus infection by leaf extract of *Celosia cristata*

639 *E. S. Scott, T. J. Wicks and T. C. Lee.* The development of an assay for resistance to *Phytophthora cambivora* in almond rootstocks using shoots excised from tissue cultures

New or unusual records

646 *A. J. Inman, B. D. L. Fitt and R. L. Evans.* A species of *Unguicularia* on oilseed rape, and its importance in studies of the epidemiology of light leaf spot (*Pyrenopeziza brassicae*)

653 Book reviews

NUMBER 6 DECEMBER

Letter to the editor

657 *G. Hughes and L. V. Madden.* Aggregation and incidence of disease

661 *A. J. Dik and J. A. Van Pelt.* Interaction between phyllosphere yeasts, aphid honeydew and fungicide effectiveness in wheat under field conditions

676 *A. C. Wright and R. E. Gaunt.* Disease–yield relationship in barley. I. Yield, dry matter accumulation and yield-loss models

688 *R. E. Gaunt and A. C. Wright.* Disease–yield relationship in barley. II. Contribution of stored stem reserves to grain filling

702 *S. J. Eden-Green, R. Balfas and T. Sutarjo.* Characteristics of the transmission of Sumatra disease of cloves by tube-building cercopoids, *Hindola* spp.

713 *M. Henry, R. I. B. Francki and H. Wallwork.* Occurrence of barley yellow dwarf virus in cereals and grasses of the low-rainfall wheatbelt of South Australia

722 *C. D. Toscano Underwood and R. B. Pearce.* Stilbene glucoside levels and the resistance of Sitka spruce (*Picea sitchensis*) tissues to colonization by root- and butt-rotting fungi

730 *E. Ward and R. M. Gray.* Generation of a ribosomal DNA probe by PCR and its use in identification of fungi within the *Gaeumannomyces–Phialophora* complex

737 *N. Maurin and B. Tivoli.* Variation in the resistance of *Vicia faba* to *Ascochyta fabae* in relation to disease development in field trials

745 *G. A. Hide, P. J. Read and S. M. Hall.* Resistance to thiabendazole in *Fusarium* species isolated from potato tubers affected by dry rot

749 *H. Lecoq, D. Bourdin, C. Wipf-Scheibel, M. Bon, H. Lot, O. Lemaire and E. Herrbach.* A new yellowing disease of cucurbits caused by a luteovirus, cucurbit aphid-borne yellows virus

762 *D. G. A. Walkey, H. Lecoq, R. Collier and S. Dobson.* Studies on the control of zucchini yellow mosaic virus in courgettes by mild strain protection

New or unusual records

772 *R. S. Lutchmeah.* A new disease of passion fruit in Mauritius: postharvest stem-end rot caused by *Phomopsis tersa*

774 *E. K. Ligoxigakis and D. J. Vakalounakis.* Occurrence of race 2 of *Verticillium dahliae* on tomatoes in Crete

777 *C. G. Wilson and R. N. Pitkethley.* Botryodiplodia dieback of *Mimosa pigra*, a noxious weed in northern Australia

780 Book reviews
